Missing certificate for shared file 913815

Request and install SSL certificate to access this document.

Using Digital Certificates on Machines Without Internet Access

How to Install a Missing Certificate for a shared PDFs

Locate the certificate that has been issued for your Cloud Document, then click the icon associated with that certificate.

Download the file to the Certificates folder in the directory where you received Cloud Document.

This folder already contains a certificate file named trust\_ca\_cert.wsf. This certificate file must always be present.
